Please find below and/or attached an Office communication concerning this application or proceeding.

			$-(\Delta$				
	Application No.	Applicant(s)					
	09/647,953	MISHIMA ET AL.					
Office Action Summary	Examiner	Art Unit					
	Brian K Talbot	1762					
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
Status 1)⊠ Responsive to communication(s) filed on <u>11 December 2000</u> .							
<u> </u>	s action is non-fir	al.					
3)☐ Since this application is in condition for allowa			ne merits is				
closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213. Disposition of Claims							
4)⊠ Claim(s) <u>1-94</u> is/are pending in the application.							
4a) Of the above claim(s) is/are withdrawn from consideration.							
5) Claim(s) is/are allowed.							
6)⊠ Claim(s) <u>1-94</u> is/are rejected.							
7) Claim(s) is/are objected to.							
8) Claim(s) are subject to restriction and/or election requirement.							
Application Papers							
9) The specification is objected to by the Examiner.							
10)⊠ The drawing(s) filed on <u>11 December 2000</u> is/ar	e: a)⊠ accepted c	r b)⊡ objected to by the Examine	er.				
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).							
11) The proposed drawing correction filed on			ner.				
If approved, corrected drawings are required in reply to this Office action.							
12)☐ The oath or declaration is objected to by the Examiner.							
Priority under 35 U.S.C. §§ 119 and 120							
13)⊠ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).							
a)⊠ All b)□ Some * c)□ None of:							
 Certified copies of the priority documents 	s have been recei	ved.					
2. Certified copies of the priority documents have been received in Application No							
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received. 							
14)☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).							
a) The translation of the foreign language provisional application has been received. 15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.							
Attachment(s)

Application/Control Number: 09/647,953 Page 2

Art Unit: 1762

1. The pre-amendment filed 12/11/00 has been considered and entered. Claims 1-94 remain

in the application.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim1-94 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The terms "giving" and "given" make the claim unclear and confusing.

With respect to claims 7-73, the claims are not further limiting. The Examiner questions the difference between the claims "distance" (claim 1,etc.) and the "distribution of distance" (claim 20,36,etc.). The Examiner questions the difference between the claims "thickness" (claim 10,etc. and the "distribution of thickness" (claim 9,28,etc.). Clarification is requested.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 09/647,953

Art Unit: 1762

Claims 1-94 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 10-58668, JP 11-25852, Banno et al. (6,060,113) or EP 736,890 in combination with JP 10-5654 or JP 06-163,499.

JP 10-58668, JP 11-25852, Banno et al. (6,060,113) or EP 736,890

JP 10-58668, JP 11-25852, Banno et al. (6,060,113) or EP 736,890 all teach forming electron emitting device comprising a substrate, electrodes, an electroconductive thin film and an electron emitting region. A metal-containing liquid composition is applied between the electrodes by fine drop application means using a piezoelectric device or a bubble-jet system or an ink-jet system. Thereafter the applied composition is baked to produce the electroconductive film. The drops are applied between the electrodes by moving the substrate, nozzle or both. The timing of the droplet depositing and the angle of the substrate are controlled.

JP 10-58668, JP 11-25852, Banno et al. (6,060,113) or EP 736,890 fail to teach measuring/controlling the distance(height) from the droplet nozzle to the surface to be coated.

JP 10-5654 teaches a coating machine for applying paste to a substrate with a nozzle where the angularity/height of the nozzle from the coating surface is measured and controlled. Nozzle is held at a controlled height regardless of the contour of the substrate.

JP 06-163,499 teaches controlling the distance from the nozzle to the substrate to maintain a constant distance between the nozzle and surface to be coated.

Therefore, it would have been within the skill of one practicing in the art to have modified JP 10-58668, JP 11-25852, Banno et al. (6,060,113) or EP 736,890 process by

Application/Control Number: 09/647,953

Art Unit: 1762

incorporating the measuring device as evidenced by either JP 10-5654 or JP 06-163,499 with the

expectation of achieving a greater control of the subsequent deposited material.

4. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Brian K Talbot whose telephone number is (703) 305-3775. The

examiner can normally be reached on Monday-Friday 6AM-3PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Shrive P Beck can be reached on (703) 308-2333. The fax phone numbers for the

organization where this application or proceeding is assigned are (703) 872-9310 for regular

communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 305-3775.
